

**Job Description:**

We are hiring for Associate, Analyst, and Assistant Team Lead roles within our Inventory & Accounting domain, offering an excellent opportunity for CMA candidates to apply their core accounting knowledge in a dynamic, system-driven environment.

This role goes beyond traditional accounting by integrating inventory accounting with ERP systems and eCommerce operations. Candidates will gain hands-on exposure to inventory valuation (FIFO/Weighted Average), COGS impact, financial reporting, and end-to-end stock lifecycle management, while working across modern accounting and ERP platforms.

The position provides strong learning and growth in areas such as MIS reporting, month-end closures, reconciliations, process optimization, and system implementation. Candidates will also work closely with cross-functional teams, enhancing their understanding of how operational activities translate into financial outcomes.

We are specifically looking for CMA (Inter/Final) candidates or qualified CAs who have a strong foundation in accounting concepts and are keen to build expertise in inventory accounting, ERP systems, and business process improvement.

This is an ideal opportunity for candidates who want to move beyond routine accounting and develop a well-rounded profile combining finance, systems, and analytical skills.

CTC ( per annum ) - Up to Rs.7.00 Lakhs (Approx)
